Experiment 2: Mobile Station UI Prototype Using Figma

Aim: -To design a user interface prototype for a mobile station using Figma, considering connectivity and convenience.

Procedure

1. Open Figma and create a new design file.
2. Create a mobile phone frame to represent the mobile station interface.
3. Add a header displaying the mobile station name and network status.
4. Add interface elements to display network signal strength, mobile data, Wi-Fi, and battery status.
5. Create buttons for making calls, sending messages, and accessing contacts.
6. Add connectivity controls to enable or disable Wi-Fi and mobile data.
7. Design a simple layout with clear icons, readable text, and suitable colors.
8. Arrange the interface elements neatly to improve user convenience and accessibility.
9. Use Figma prototype connections to simulate navigation between the main screen and the calling or messaging screens.
10. Preview the prototype and verify that the interface is clear, convenient, and easy to use.

Output: -

https://www.figma.com/design/ioy3bAnLIFXI1Lh04Fk218/Mobile-Station-UI-Prototype-Updated.?node-id=0-1&p=f&t=I8RiYbszxjo6cIqa-0

Result: -Thus, a user interface prototype for a mobile station was designed successfully using Figma. The prototype displays connectivity information and provides convenient controls for calls, messages, contacts, Wi-Fi, and mobile data.
